ANDRITZ | www.andritz.com

- For more than 125 years , Andritz manufactures the highest reliable and durable pumps and motors for all applications. Ritz produces pumps for water supply, mining, industry and sewage.
- Ritz produces all types of pumps, axial split case, end suction, high pressure, submersible, vertical line shaft pumps and sewage pumps, with different materials and high efficiency performance.
- Ritz manufacturers a special submersible motors up to 5000kw, with a high tension up to 14000V, high temperature up to 750C application. 2, 4, 6 and 8 poles execution. Using different high quality materials to suite aggressive well water.

ERHARD
BY TALIS | www.erhard.de

- ERHARD is one of the brands of TALIS International Group, which is famous for providing valves, project connectors, water transport, water hammer control valves, non-return valves, butterfly valves, gate valves and sanitary valves.
- Erhard has integrated solutions for valves systems for municipal, industrial and residential projects.
- Manufactured in Germany with high quality. The company owns a research and development department and a certified valves laboratory.

Baker Hughes | www.bakerhughes.com

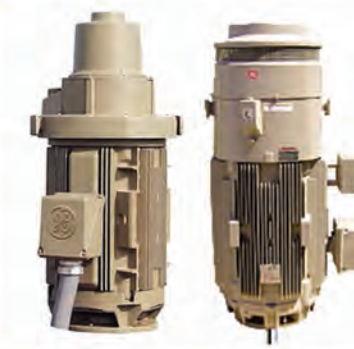

- A well known name in pumping systems, designed to lower costs, reduce risk and improve pumping productivity.
- Produces a high performance pumps up to 4500GPM, and a high efficiency motors with dependable protection. Power cable and switch boards are of it's high quality products.

GE | www.geenergyconnections.com

- GE is worldwide leading manufacturer of motors which operate efficiently in challenging applications and severe environments where reliability and ease of maintenance is critical.
- GES' best in class horizontal motors are widely used all kinds of water pumping systems, ranging from low, medium to high voltages with best efficiency and reliability.
- In addition, the state of the art Vertical Hollow Shaft (VHS) motors for well pumps applications are known for their rugged construction and reliability, reaching up to 500 HP with several voltages options available to choose from.

HITACHI
Inspire the Next | www.hitachi-ies.co.jp/english

- Hitachi was the first to manufacture electric motors in Japan in 1914. So it's the pioneer of submersible motors market.
- Hitachi manufactures a complete range of submersible pump motors, 6" up to 14" size for a standard and high temperature application up to 750C with standard and stainless steel construction.

GORMAN-RUPP PUMPS | www.grpumos.com

- For more than 80 years, Gorman-Rupp has manufactured the high performance, high quality pumps and pumping systems required for lasting service in the municipal, water, wastewater, sewage, industrial, construction, petroleum, fire and OEM markets.
- Gorman-Rupp's extensive line of pump products include self-priming centrifugal pumps, standard centrifugal pumps, submersible pumps, trash pumps, priming assisted pumps, and rotary gear pumps.

SEEPEx.
ALL THINGS FLOW | www.seepex.com

- SEEPEX is a leading worldwide specialist in pump technology. Their progressive cavity pumps, macerators and control systems are used wherever low to highly viscous, aggressive or abrasive media must be conveyed at low pulsation rates – SEEPEX keeps everything flowing. Customers choose them because they offer excellent, reliable and cost-efficient solutions.
- Their product line consists of the latest and smartest technology; Smart Air Injection, Smart Conveying Technology, Mine Dewatering Unit, Metering Pump, Food Pumps, and Control Systems.

Franklin Electric | www.franklin-electric.de

- The world's largest manufacturer of submersible motors. Franklin Electric success keys are quality, availability, service, innovation, and value.
- Franklin Electric produce a wide range to meet various applications requirements. Encapsulated and Rewindable types, up to 500hp and 12" size with different rating voltages. Using different high quality materials.

E-Tech
Franklin Electric | www.etechnpumps.com

- Italian famous manufacture of high quality stainless steel submersible pumps and vertical multistage pumps.
- E-Tech pumps are utilized in a wide range of applications including residential, commercial, firefighting and industrial installations. For submersible pumps, it produced with flow up to 130 m3/hr. and head up to 600m, for the vertical multistage pump, the maximum flow is up to 30 m3/hr. and head up to 230m.

GENERAL PUMPS | <https://pumpsgp.com>

- Since 1990, GP provides In-House Design and Manufacturing (In house casting facility). With more than 2000 models of pumps sold in more than 20 countries worldwide,
- GP is renowned for supplying various types of pumps. From UL-listed fire-fighting sets, Split-Case, End-suction pumps, to domestic booster pumps.
- GP assures that each and every pump is computerized performance tested according to ISO 9906 / ANSI/HI/14.6 standard.

EBARA | <https://www.ebara.co.jp/en>

- EBARA Corporation is recognized as a world leader in the design, development and manufacture of pumps. And in the domestic market,
- EBARA has proven its dominance in providing cutting-edge technology and robust designs for their centrifugal pumps.
- From pressure boosting to irrigation applications, EBARA pumps have proved to be a trusted partner for our clients.

ARISTONCAVI | www.aristoncavi.com

- Aristoncavi is one of the most important independent manufacturers of rubber cable, in different formation for a wide range of applications.
- Insulated low-voltage, medium-voltage and special cables which classified to fire and high temperature resistance, heavy duty conditions resistance cables and cables that resisting liquids and DRINCABLE is some of cables types that Aristoncavi produced.
